## CONSULTANCY & CONCEPT

Ardmore Craig is a leading provider of specialist consultancy services for the offshore oil & gas and renewables sectors. The business has undertaken 3rd party verification work, design appraisals, failure analysis and due diligence work for clients including operators, contractors, equipment manufactures and private equity houses.

Following on from its consultancy tasks, the team is often requested to undertake concept design work developing existing solutions or creating new concepts from scratch, often in rapid timescales and with significant operational, geometric and cost constraints.

## CAPABILITY STUDY E

## SURVEYS & MOBILISATIONS

Having undertaken equipment and vessels surveys around the world, Ardmore Craig is well placed to assist its client in understanding the issues associated with existing equipment and planned mobilisations.

Work undertaken has included pre-mobilisation surveys, initial design checks, upgrade studies and equipment modifications.

The team can assist with on-site support and guidance, design of secondary equipment and completion of seafastening work including design, weld calculations, deck loading analysis and summary reports for third party approval.
