

CAPABILITY STUDY C

MODELING & DRAFTING

As part of its design packages Ardmore Craig supply 3D models alongside detailed component, fabrication and assembly drawings with required tolerances, welds and finishes.

Fabrication drawings are provided with individual plate profiles and section details improving the efficiency and time for manufacturing operations.

The Ardmore Craig team are competent in using Inventor for 3D modelling & draughting and 2D AutoCAD software providing different tools depending on client requirements and the format of background information.

CAPABILITY STUDY C

RENDER

Utilising its 3D modelling skills and software capabilities Ardmore Craig can produce high quality renders of equipment & vessel layouts and has a track record of delivering rendered animations and fly arounds.

Clients have successfully used these services for staff training, sales and client presentations. We can produce images for operations and maintenance manuals as well as patent applications, shows and exhibitions showing how equipment will be used, the context it is located in and the step by step procedures needed to operate it.
